

THE POWER OF PROTECTION WITH KNOVI™ MONITORING TECHNOLOGY

INNOVATIONS THAT HELP YOU ACTIVELY MONITOR YOUR ROOFTOP FOR PROBLEMS

Water can be devastating. Leaks are problems, but the enormous weight of trapped water from clogged roof drains can cause catastrophic damage.

Tremco Roofing can help prevent this with Knovi Monitoring Technology featuring SmartDrain™ rooftop sensors. Attached to your rooftop drains, SmartDrain sensors send automatic alerts through the SmartGateway™ when they detect rising water. The more water, the bigger the problem, so imagine being able to avoid drain disasters before they happen!

SMARTGATEWAY AND MONITORING

Our sensors monitor your rooftop 24/7. SmartGateway software ensures constant wireless communication between you and all your SmartDrain sensors, sending alerts and updates to your mobile device or PC to notify you of potential issues in real time.

ROOFTOP MANAGEMENT

Each SmartDrain integrates with our comprehensive facility database, which contains everything you need to know to cost effectively manage your roofs—maintenance data, photos, and much more. You can even receive customized reminders about your roof's warranty (with an annual countdown feature), inspections and sensor maintenance.

- ☎ 24 hour rooftop monitoring, with alerts for rooftop flooding and excessive water accumulation
- ☎ Spring and fall roof maintenance reminders
- ☎ Fast access to valuable roof history
- ☎ Five year product warranty
- ☎ Save time, money on your service calls
- ☎ Weather updates and severe weather alerts
- ☎ Battery alert

PROTECT YOUR ROOF AND BUILDING FROM THE THREAT OF RISING WATER

3 Easy Steps To Get Your Roof Actively Monitored
