## WHY METAL DEPOTS

Metal Depots is a national network of retail outlets established to serve do-it-yourselfers, suburban farmers and contractors for all metal projects. We offer a large variety of metal panels perfectly suited for commercial and residential metal roofing, a wide array of metal building components and a full spectrum of metal buildings ranging from small backyard buildings to full-size commercial buildings spanning thousands of square feet.

We've gone to great lengths and exhausted thousands of hours designing and developing what we believe are the best metal buildings, metal panels and metal components available. Our pride is built on providing the highest quality metal products available, and we're able to because of our people who are recognized for their world-class customer service and product expertise.

# BENEFITS OF METAL

There are a vast number of reasons why metal roofing is the ideal choice for your home or business. The benefits of metal roofing are unlike those of any other roofing materials.

- Longer lifespan – a new metal roof lasts more than 40 years
- Improved energy bills and reduced energy consumption with Metal Depots' Cool Roof Coating Technology
- UL 90 Rated against wind uplift
- UL Class A Rated for external fire exposure
- UL Class 4 Impact resistance rated against hail and inclement weather
- Potential insurance savings of up to 35% (Please discuss with your insurance agent.)
- Environmental appeal – our metal roof panels are made from 25-35% recycled material and are virtually 100% recyclable
- Little to no maintenance for years to come

## PROTECTION THAT PAYS

Metal roofing is recognized for its durability and resistance to inclement weather. With a metal roof from Metal Depots, you can feel confident in its ability to better protect your home or business against wind, hail, ice, snow and fire compared to other roofing materials. Metal Depots metal roofs are less affected during extreme temperature cycles that tend to erode traditional asphalt shingles. Additionally, because Metal Depots' metal roofing panels are covered by Underwriters Laboratories (UL) Class A\* Fire Rating, UL 90 wind uplift rating and our Class 4 UL Impact Resistance (hail) rating, you could potentially see up to a 35% reduction in your homeowner's insurance premiums.

\* Class A over solid deck requires a Class A rated underlayment on top of the plywood deck.

## ENERGY EFFICIENT

Metal Depots metal roofs are ENERGY STAR® approved and meet the requirements of the Cool Roof Rating Council. When properly designed and installed, a cool metal roof can reduce energy consumption, providing significant cost savings as it absorbs up to 34% less heat than asphalt shingles. This, in turn, decreases unnecessary stress on the cooling system within your home or business and, with ever-rising costs of utilities, you'll see an immediate and long-lasting return on your investment.

## ENVIRONMENTALLY CONSCIOUS

Metal roofs are one of the most environmentally friendly roof systems available. Our residential metal roof panels consist of 25-35% recycled material and are virtually 100% recyclable when removed after their long and useful life. Also, because our metal roof panels are light (less than 1.6 pounds per square foot) they can often be placed directly over existing roofing, saving the time and labor of removing the existing roofing material, thus reducing landfill waste.

## CURB APPEAL

With a wide variety of profiles and colors available, a metal roof will help you achieve the design and appearance you and your home deserve. Whether you're looking for a bold, distinctive color, an architecturally appealing roof creating interesting roof lines, or a low profile with a naturalistic earth tone, you'll find what you need at Metal Depots.

Metal roofing is ideal for all types of weather conditions and climates. So, whether you live or work in the desert, the mountains, by the ocean or in the plains, a metal roof for your home or business will stand up to the weather while beautifying its appearance.

Metal Depots offers two different types of metal roofing systems. The first consists of our concealed fastener systems, which include our Slimline® and LokSeam® panels. The second type is our exposed fastener series, which includes our Stormproof®, 5V Crimp and PBR panels.

LokSeam® is a snap-together standing seam roof system with a 1-3/4" tall vertical rib, for use on roofs with a minimum slope of 3:12. LokSeam® panels are available in 12-inch, 16-inch and 18-inch widths. LokSeam® panels can be installed over open framing or a solid substructure and are capable of transitioning from roof to fascia with the use of a rib cover. LokSeam® does not require a solid substructure for support.

These functional 36" wide Utility-Grade panels are offered in the premium siliconized polyester paint system or bare Galvalume Plus®. Perfect for small barns, animal confinement, and other small jobs, these secondary-grade panels are sold "as is" and are subject to availability. As such, they may have a variety of defects and do not include a warranty.

## TREAT YOUR HOME LIKE FAMILY

For more than 100 years, metal roofing has been trusted to protect homes all over the world. Recognized for its superior performance, energy efficiency, protective attributes and beautiful aesthetics, metal roofing is the only choice for discerning, quality-conscious buyers.

## RESIDENTIAL SOLUTIONS

At Metal Depots we've created residential solutions with you in mind. Whether you're interested in satellite mapping of your roof, a digital measurement of your roof area and lines, or advice on what panel type and color would be best suited for your home, the Metal Depots team is ready to help.

## SAVE TIME & MONEY

As an industry leader in what's next, we pride ourselves on delivering the most efficient and effective customer solutions possible. Utilizing high definition satellite imagery, our estimators can virtually fly over your house, capturing the necessary images needed to create a real-time model of your roof.

# WARRANTY INFORMATION

What's in a warranty? With Metal Depots – Protection, Confidence and Security. Warranties are the backbone of a product, and with Metal Depots you'll sleep better knowing the investment you've made is covered by a national brand. If you're shopping for the right roofing option for your house, we encourage you to compare our warranty to any competitor's or other roofing material's warranty and see how ours rises above the crowd. Other suppliers may claim to offer the best warranties, but when compared to ours, they don't meet the requirements you, as a homeowner, demand and deserve.

Our industry leading 40-year limited finish warranty covers paint film fading and chalking of your new roof panels. Metal Depots also offers an array of weathertightness warranties of up to 20 years to further display our confidence in the undisputed quality of our metal roofing systems. We also provide a 20-year warranty on our Galvalume® substrate for our unpainted panels.

# OTHER OFFERINGS

## BUILDINGS

Whether you're looking for some extra space for your lawn tools, a new garage for your cars or a custom metal building for retail, commercial or religious space; Metal Depots has it all. With our wide variety of pre-engineered metal buildings, you'll be able to find the style, colors and efficiencies you need to make your project a success. Visit us online at [MetalDepots.com](http://MetalDepots.com) for our full selection of metal buildings or to design, customize and order your own.

## COMPONENTS

Metal Depots also offers a full array of accessories to increase the functionality of your building. You'll find roof jacks, light transmitting panels, louvers, trim, fasteners, tools, doors, insulation and closure strips; everything you need to build or complete your next project. Whether you're looking for the top of the line roll-up doors from DBCI or simple square tubing for your project, Metal Depots has it all.
