

WHEN QUALITY MATTERS

BITEC
BITUMEN TECHNOLOGY™

"I have been stocking and selling Bitec products since the mid-90s. Their products are high quality, and so is their service. My contractors demand it."

Dell Jackson, Branch Manager

Gulfeagle Supply - Panama City, Fla.

QUALITY MATTERS

There's a good reason contractors demand Bitec products. They can trust the quality. At Bitec, quality is a roof membrane that is proven to perform, strong and durable. Quality is something we have taken pride in since our founding. When raw material prices rose and others in the industry chose to cheapen their products with filler material, we remained loyal to our original formula.

*We will not sacrifice quality because when it comes to roofing, **QUALITY IS KEY.***

"Their attention to quality stands alone and truly sets them apart from other manufacturers. I have no hesitation using Bitec products on high-profile projects."

Tony Hall, Founder

Paradigm Roofing - McKinney, Texas
Authorized applicator since 2014

OUR COMMITMENT

If there's one thing our current customers would say about us, it's that you can trust us. We'll never make promises we can't keep, and we'll always deliver on those we make.

We may be a small company, but we take pride in being able to offer customers the kind of individualized support you don't always get from mega corporations. We'll be there for you when you need us.

OUR PRODUCTS

Bitec offers an impressive line of APP, SBS and self-adhered cap sheets. We also provide base sheets, adhesives, coatings and underlayments for a full roof assembly.

APP MEMBRANES

We use only the highest quality asphalt and reinforced polyester fabric and chemically bond the two using a process that ensures the strength, flexibility and elasticity necessary for long-term waterproofing protection.

SBS MEMBRANES

Our SBS membranes are built to withstand Mother Nature's most extreme conditions. They provide strength, proven performance and allow for various installation methods to accommodate your project's exact specifications.

SELF-ADHERING

Our Imperflex® membranes are self-adhering for safe and convenient installation on residential roofs where roof slopes prevent the effective use of shingles, tile or metal.

BASE SHEETS

Base sheets set the foundation for the roof's performance, which is why ours are manufactured with the highest quality asphalt and reinforcements.

ADHESIVES

Complete your Bitec roof installation with our cold process adhesive or use our trowel-grade mastic to patch and repair leaks on asphalt roofs. Our easy-to-use flashing adhesive is available as either an APP or SBS compound.

COATINGS

Bitec roof coatings transform asphalt roofs into reflective roofs that lower energy costs and help extend the roof system's life.

UNDERLAYMENTS

Underlayments are critical to the waterproofing integrity of roof systems. Bitec has underlayments for both residential and commercial applications.

“The adage ‘do one thing and do it better than anyone else’ comes to mind. We are very happy to be a Bitec distributor.”

Ted Sheldon, Branch Manager
Gulfeagle Supply - Gulfport, Miss.

ABOUT BITEC

Bitec, Inc.™ is a leading manufacturer and distributor of some of the industry’s highest-quality APP and SBS modified bitumen membranes. Since its founding in 1986, Bitec has remained committed to providing its customers with only the most innovative and highest-quality modified bitumen products. Additionally, Bitec is the only manufacturer in the country to offer pattern-design cap sheets that provide a unique opportunity to incorporate various colors and designs into low slope and pitched roofing systems without compromising performance. Bitec, headquartered in Morrilton, Ark., provides unparalleled technical support, offering complete project assistance from inception to completion.
